

Client

Burnside High School, Christchurch.
2500 students.

Project requirements

Design and install a perimeter fence in excess of 300m.
Safely separate students from two high traffic roads.
Provide more robust fencing than standard school issue.

Warner recommendation

Heavier weight Futura fencing system, unique to Warner Fences.
Loop top rail fencing for safety.
Loop top provides greater strength than single rail.
Punched railing system means rails can't be pulled from fence.
Internal spigot provides tamper-proof structure.

Installation

Project management and installation by Warner Fences, including sub-contracting of initial earthworks and placing of reinforced concrete footings.

Outcome

Highly robust, durable fencing.
Elegant solution which enhances the school's aesthetics.
Delivered to budget, on schedule.
Over 7 years, has required no maintenance or repair.
Provided template for many Christchurch schools.
