Garden & Boundary Fencing

warnerfences.co.nz

Tubular Fencing

Warner have a fence solution for every property, where you are wanting garden fences, pool fences, or security fences.

Our fences can be manufactured to fit any shape including curves, contours, slopes and changes in levels.

In order to choose the fence most suitable for you, it is important that you define precisely the functions you expect it to perform. A fence can fill several functions at once: it can be both elegant and stylish and at the same time prevent unwanted visitors from entering your property.

The big benefit of Warner is that we will work with you to see what you want and then we can make it to suit your property, be it height, width, style and colour. Being NZ made you can choose so much more, be it height, a colour to match your roof or aluminium windows, or of course a big choice of styles.

We have tools that enable you to decide what works best for you. Be it our App that will show you what a new fence will look like on your property, our showrooms in major cities so you can see what you are buying before you commit, or our team of capable sales people, Warner will work with you to ensure you get what you are after.

Solid Fencing

Fence panels are made from an aluminium honeycomb construction; first developed for the aviation industry and ship partitioning, as well as facades for high rise buildings. The combination of both strength and weight make for an outstanding fence panel design.

Aluminium honeycomb is a composite panel made of aluminium sheet and aluminium composite core. It offers the perfect strength to weight ratio. Far superior to alternative products that use polystyrene, Warner Walls offer an exceptional finish and the latest panelling technology.

The design of the Warner Wall system enables you to mix and match the finish that best suits your property. Aluminium posts offer considerable strength with no risk of rust and yet enable a powder coated colour finish that is second to none. The choice is yours with the option of full solid fence panels or a combination of solid panels at the bottom with architectural louvres, slats, weatherboard, tongue and groove panelling or tubular fencing on top.

Warner Walls are ideal for the front or side fence, beside the pool to block the wind, reduce noise or to provide privacy and security. Warner Walls; new technology for a better wall.

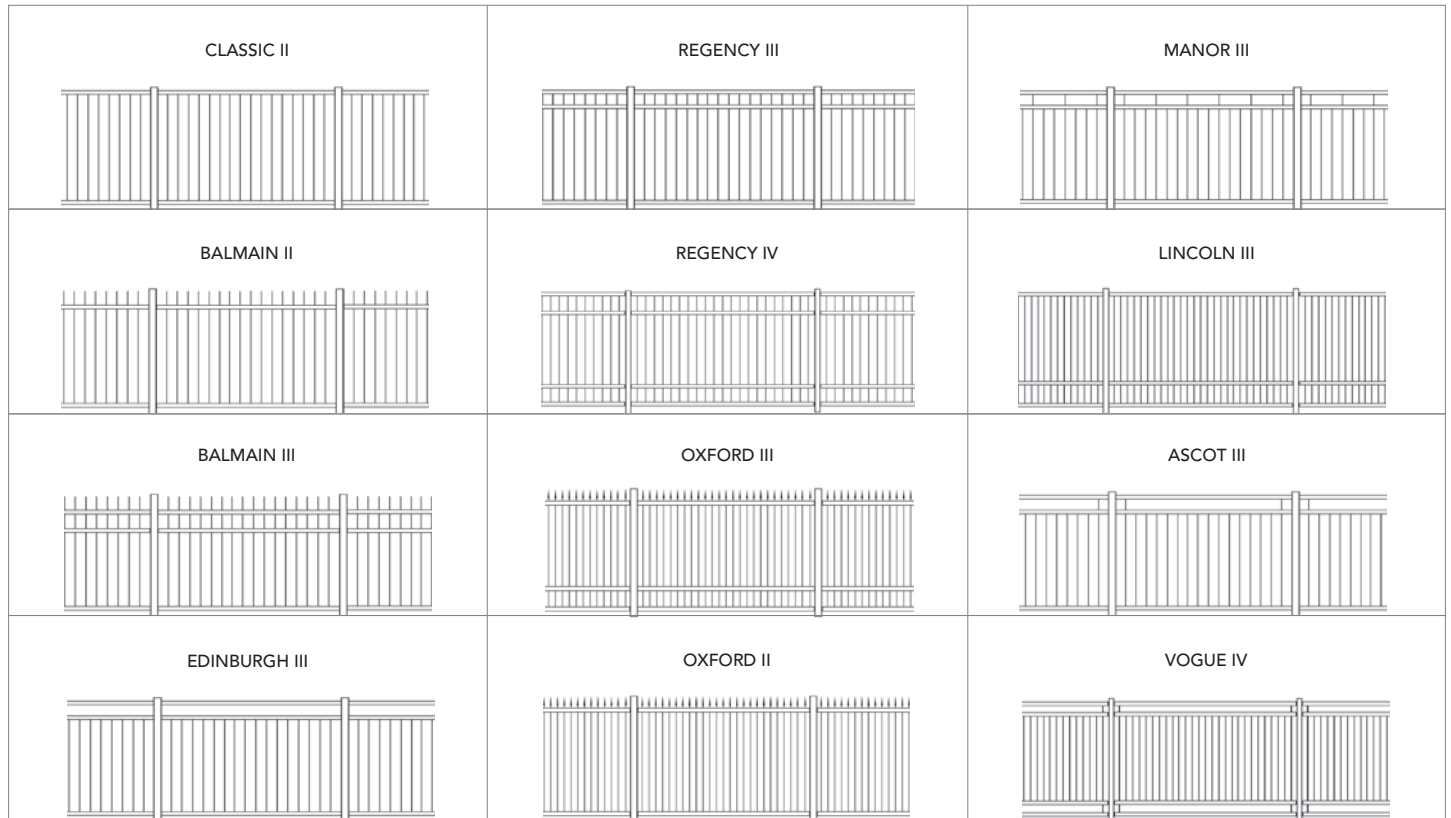

Architectural Fence & Finishes

Our own great fencing system enables you to design and build a solid panel fence with a combination of slats, louvres, weatherboards, tongue and groove panels.

Use this to make feature walls, or to match a feature on your house or simply to enhance your outdoor area. All made from Aluminium and powder coated in house, these panels will not warp and they will look good for years.

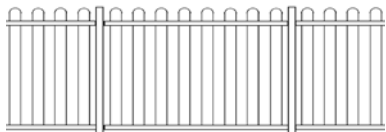

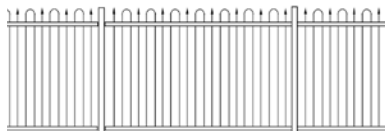

Popular tubular fence designs
