Glass ●

The Warner glass is of the highest quality. Made and stamped to the PAS Mark, this shows that this glass is manufactured to comply with AS / NZS 2208:1996 for safety glazing materials in buildings. The toughened glass is 12mm thick and has a 5mm radius on all corners the edges are polished, giving a smooth finish all round.

Spigot ●

Warner can offer the choice of two spigots; the Wanaka and the Taupo. Both are suitable for swimming pool fencing and both are made from the highest grade of Stainless Steel, Duplex 2205. The attractive spigot system offers many advantages to traditional glass pool fence systems. It is neat, yet strong. It provides minimal visual impact, enabling the glass to provide a barrier with no high posts or top rails.

Latch ●

There is nothing better than a tried and true product and the D&D latch offers just that. From the leading supplier of pool gate latches this latch not only looks good, it works and works.

Hinge ●

If there is one thing that is more important than any other item on the pool enclosure, it is the hinge. If the hinge doesn't work you may as well not have a fence. The Warner glass pool fence system uses the Polaris Hinge. A soft close hinge that is tested for 10,000 cycles. The only hinge on the market specifically designed for pool gates with this level of testing. The soft close system is achieved through both hinges and magnets, with the magnets ensure a soft close for that last few centimetres.  POLARIS
SOFT CLOSE HINGE

Installation ●

Warner frameless Glass Pool Fencing; including fixings, has been designed and tested by an engineer and come with a PS1 (on request from your installer). We recommend that a professional installs this system for the best results. Glass is both heavy and requires care at installation. Warners installers are trained and experienced in installing this.
